

GAUGE REDUCERS

The Quick-Transition, Space Saving Accessory

The Seal-Rite™ Gauge Reducer provides easy and quick transition for a variety of applications. These reducers are machined from 316L Stainless Steel and are permanently marked with heat number. They are electropolished in compliance with the highest sanitary standards. These reducers provide solutions when standard concentric reducers aren't conducive for tight, confined areas.

For available sizes:
Please contact the factory

Features

- I.D. Surface Finish Meet or Exceed 15 Ra.
- Machined from 316L S.S. Solid Bar
- Heat Number laser etched for permanent traceability
- Electropolished to ASME/ BPE SF4

Benefits

- Helps to reduce costs
- Single Heat Number
- Saves space when reducing or increasing tubing sizes
- Quick transition

Applications

- Instrumentation/ Gauge placement
- Tightly confined spaces
 - Skid building
 - Load Cells

Part Number	B Dim	A Dim
GR050/075R/P	1/2"	3/4"
GR050/100R/P	1/2"	1"
GR050/150R/P	1/2"	1-1/2"
GR050/200R/P	1/2"	2"
GR050/250R/P	1/2"	2-1/2"
GR050/300R/P	1/2"	3"

Part Number	B Dim	A Dim
